Declaring our Caring

Lawrence Weston Community and Climate Action Plan 2022-2030

www.ambitionlw.org
Opening message from our Chair of Directors: Norman Routledge

‘As the Chair of Directors for Ambition Lawrence Weston, it is a great honour to present to you our community summary of our resident led community climate action plan for Lawrence Weston. We have worked hard to consult and listen to our residents to co-produce our Community Climate Action Plan which is an important document, that not only outlines our residents’ aspirations to becoming carbon neutral by 2030, but highlights the co-benefits to their overall health and wellbeing with solutions to creating a healthy and sustainable future for all’.

Introduction

We are facing a global climate and ecological emergency. We need to act now. Bristol has declared a Climate Emergency and communities have a critical role to play. In response to the Climate Emergency, Bristol has set itself the task of reducing direct and indirect carbon emissions to net zero by 2030. Bristol’s One City Environmental Sustainability Board, published the One City Climate Strategy in February 2020, setting out a pathway of action on how Bristol can become carbon neutral and climate resilient. This plan will be Lawrence Weston’s own community plan to become carbon neutral by 2030.

Thank you to everyone that took the time during our 2021 consultation to take part in the survey and activities to give us your important views and priorities for developing this plan. It was a pleasure to work with each and every one of you – and I look forward to working with residents and partners across the neighbourhood to deliver these priorities into action. Working together we really can make a difference and improve Lawrence Weston for everyone.

Donna Sealey, Ambition Lawrence Weston
So how did we get to this point? –
The journey so far

2011
- Lawrence Weston Community Network Established
- Community Research Undertaken

2012
- Lawrence Weston Planning Group Established
- Funding for 2 new playgrounds
- Launch of On Your Doorstep Magazine
- Big Lottery announce Lawrence Weston will receive £1 million
- Ambition Lawrence Weston Incorporated

2013
- Big Local lottery programme launched
- Lawrence Weston Community Plan launched

2014
- Community Led Housing Group Established
- Revived Community carnival

2015
- Neighbourhood Development Plan written
- Planning application for Community Hub granted

2016
- Community Owned Solar Farm starts building
- First Christmas event held
- ALW saves the Youth Centre from closure

2017
- Lidl starts building work
- New community survey
- Neighbourhood Development Plan adopted

2018
- Lidl opens
- Refreshed Community Plan Launched

2019
- Created Lawrence Weston in Bloom and received our 1st award
- Planning permission received for our community owned wind turbine

2020
- Changed the way we worked to become an emergency response hub supporting residents during COVID-19 Lockdown

2021
- Represented Lawrence Weston at COP26
- Planning permission received for Astry Close energy efficient housing and Ambition House energy efficient Community Hub

2022
- Received BIF2 funding for the next four years
- Published our new community climate action plan

Why did we write a Community ‘Climate’ Plan?

While we have previously written Community plans, we are aware that for Bristol to achieve its ambitious zero carbon ambitions by 2030, the collective skills, knowledge and energy of the whole city will be needed. Communities and Community hub organisations have an important role in this. We are still focussing on improving health and wellbeing, but have now included our ambitions to become carbon neutral into this plan.

Mark Pepper, Lifelong Resident of Lawrence Weston and Ambition Lawrence Weston Development Manager

Just to assure the residents, Ambition Lawrence Weston are committed on delivering climate change, but not at the expense of meeting the residents more immediate and pressing priorities, like poverty, housing needs and access to services and employment. We are absolutely focussed on meeting the pressures our residents are experiencing right now, whilst impacting on positive climate change outcomes at the same time.

Mark Pepper, Lifelong Resident of Lawrence Weston and Ambition Lawrence Weston Development Manager
We came together to take action after a decline in services and closure of local facilities. In 2012 we formed a Charity and registered company limited by guarantee to improve living in our area. Ambition Lawrence Weston aims to reduce economic and social disadvantage experienced by many residents, increase participation in community life and to improve access to opportunities and services that residents need and deserve. Our work is directed and delivered by our residents, for our residents.

Lawrence Weston is a friendly and vibrant neighbourhood where the word “community” really matters. It will become a community where residents of all ages, can live happy, healthy and fulfilling lives both now, and in the future. We want to ensure the creation of a mixed, well-balanced community with high-quality, energy-efficient, affordable accommodation. Residents will be able to travel safely on well-connected and affordable transport routes, and access high quality jobs, services and shops. They will be able to enjoy modern community, health and leisure facilities and an attractive environment which is safe, clean and well-maintained.

Residents have led and shaped the energy projects in Lawrence Weston to improve health and wellbeing (tackling fuel poverty) and to tackle the climate emergency. Residents, when surveyed, overwhelmingly support renewable energy and this is demonstrated by their support for a new community onshore wind turbine. If we are to truly realise the challenge of the climate emergency it must be done with people and meet health and wellbeing needs. In doing so, a healthy home is a healthy planet.

David Tudgey, Project Development Manager of Ambition Community Energy CIC
Our vision for Lawrence Weston

Ambition Lawrence Weston's collective goal is to ensure a fair and just energy transition that benefits left behind communities to ensure we are benefitting from the positive impacts delivered when addressing climate change.

Our aim is to improve the health and wellbeing of residents and ensure they are not left even further behind than the rest of society, whilst taking equal responsibility and delivery for the climate changes needed.

By creating an accessible energy learning zone, it will demystify renewable energy, give engagement and awareness about climate change, involve communities in the energy transition, inspire the next generations of renewable energy engineers by involving schools, parents, young people, trades, and households.

Upskilling trade’s people will support the current skill shortages that is restricting the delivery of new environmentally friendly ways of construction.

Ambition Lawrence Weston is a community driven Regeneration Project for the Lawrence Weston community. Having carefully researched and published a detailed Community Development Plan (in 2013 and refreshed again in 2018), where our work is about ensuring that residents:

- Can access quality and sustainable jobs, services and shops
- Can benefit from high quality education and training throughout their lives
- Can enjoy modern community, leisure and art facilities
- Can look after their physical, mental and spiritual wellbeing with access to high quality and appropriate services and support
- Will have secure access to adequate amounts of affordable, safe, nutritious and culturally appropriate foods
- Understand their rights and are empowered to make choices to improve their own lives
- Have access to safe and well-maintained green spaces and are actively involved in their upkeep
- Enjoy an environment which is looked after, safe and clean
- Can access healthy, sustainable and affordable homes for all stages of life
- Can travel safely on well-connected and affordable routes
- Feel part of a community which supports and looks after one another and is welcoming and inclusive
- Collectively celebrate the heritage and identity of the neighbourhood and plan carefully for its future
- Have a strong voice and can be at the heart of decision making locally.

UPSKILLING TRADE’S PEOPLE WILL SUPPORT THE CURRENT SKILL SHORTAGE THAT IS RESTRICTING THE DELIVERY OF NEW ENVIRONMENTALLY FRIENDLY WAYS OF CONSTRUCTION
Three local men came together to set up a new initiative in Lawrence Weston. They wanted to set up a project where they could use their trade skills, as well as creating a safe place to bring men together. The project originally started with no home to speak of. They started with monthly outreach sessions at a local older peoples’ residential home, and were in talks with them to have a permanent container put on that site. However, as negotiations progressed, the home had a merger with another company which put the blockers on the Men in Shed project. With that in mind and considering the growing popularity of the project, there was the option to move into the Lawrence Weston Youth Centre in a former self-contained lockable craft space which was unused at the time. Ambition Lawrence Weston supported this and removed the disused kiln (and stored it away safely) and renovated the room into a proper workshop. They have subsequently expanded by adding a steel shipping container directly outside for their stock (wood, etc.) with it fence around to create a secure outside workshop. Ambition Lawrence Weston supported this idea and applied for some kickstart funding, and in 2019 ‘Men in Sheds’ was born.

Fly dumping or tipping is the dumping of waste illegally instead of you using more authorised methods like curb side collection. Why is this a problem? It could harm the wildlife by trying to eat the dumped food, and secondly, it makes the place look trampy.

Freddie (aged 12), Volunteer litter picker

Nobby, Mike and Jim had a lot of skills between them that they could share and upskill local residents who wanted to learn something new. They were also keen to support ideas that prevented items ending up in landfill unnecessarily. They run a repair café, where residents can bring either damaged or unwanted items along, have them repaired and take home, or donate to families in the local community for free. They have also been supporting Lawrence Weston in Bloom by making birdboxes and garden planters for the local community.

Men in Sheds are now exploring how they can be linked into the award winning CHEESE project (Cold Homes Energy Efficiency Survey Experts), as well as supporting other neighbourhood projects like Lawrence Weston in Bloom.

You can watch the Men in Sheds Climate Hero video here:
www.youtube.com/watch?v=NHF4bmW71uk&t=2s

‘What’s great/special/unique about our community’ is the fact that Lawrence Weston has a Neighbourhood Development Plan (NDP). This legal document sets out objectives on key themes including housing, traffic and transport, parks and green spaces, jobs and skills, community facilities, retail, health and wellbeing and urban design. Planning applications within Lawrence Weston must be considered against our NDP as well as existing planning policy. It supports achieving land-use objectives in the Lawrence Weston Community Plan. The NDP means local people now have more say in how Lawrence Weston will develop.
What this means for our community

The NDP therefore enables the community plan and its aspirations to become a reality. It empowers local residents with a louder voice that all perspective developers, including the local authority, must listen to. This also enforces engagement and consultation with, and between, local residents and developers, whilst strengthening the resident’s ability to change proposed developments to better meet the needs of the local area and its residents.

Now that the NDP received overwhelming support through a local referendum it is now recognised as a statutory document with legal standing. This then attracts a higher level of the local element of community infrastructure levy (CIL). This fund can then be used to further improve the local area and deliver both the Climate and Community plans.

I really value being able to hear the views of Lawrence Weston residents on this extremely important subject. I know that there are particular challenges which face a community on the edge of the city, and I want the Council to have a better understanding of how we can make it possible for residents in every part of the city to live, and travel, in ways which promote better health and reduce carbon emissions.

Don Alexander, Bristol City Council Labour and Co-op councillor for Avonmouth and Lawrence Weston ward and Cabinet Member for Transport.

Health inequalities arise because of the conditions in which we are born, grow, live, work and age. These conditions influence our opportunities for good health, and how we think, feel and act, and this shapes our mental health, physical health and wellbeing. Residents living in Lawrence Weston are living in deprivation, have a lower-than-average life expectancy, do well less at school and leave with no or few qualifications, have less job prospects and opportunities and live in poorer health with life limiting illnesses.
The science on the climate emergency is clear: we need urgent action to reduce our carbon emissions to limit global temperature rise to below 1.5°C, and so prevent disastrous impacts. Recently science has shown the severity of our impact on the world’s flora and fauna too. We also need to prepare for a changing climate, and adapt our societies, cultures and economies to be resilient to the impacts of climate change. Climate-related risks to the environment, health, livelihoods, homes, food security, raw materials, water supply and economic growth will rise, even if we manage to limit change to 1.5°C, and the impacts will be felt differently in different regions. Populations most at risk are marginalised, disadvantaged and vulnerable. In Bristol, some of our most deprived wards, including Avonmouth and Lawrence Weston ward, will be the most vulnerable to the physical impacts of climate change.

The potential impacts of climate change on our residents are significant and wide ranging. In the Bristol One City Climate Strategy evidence was gathered on physical climate risk to the city. Bristol’s coastline is projected to increase by up to +72cm, Winter rainfall is projected to increase by up to 48%, Summer maximum temperature is projected to increase by over +9°C, Summer rainfall is projected to decrease by up to 68%.

We are facing twin emergencies: a climate emergency and an ecological emergency. Human activities are estimated to have caused 1°C of global warming above pre-industrial levels. We are already seeing devastating impacts of 1°C warming; this is expected to get worse.
Climate change is a complex challenge. We recognise the interconnected and global nature of the world, which exposes Bristol to potentially catastrophic climate risks arising well beyond the city’s boundary. We also acknowledge our local, national and global responsibility to take bold and immediate climate action as a city; and to share our successes and challenges openly and generously.

Bristol’s One City Climate Strategy outlines the key changes across the city, and the UK, that will be needed to reach this goal. Whilst Lawrence Weston’s households have a lower than Bristol-average carbon footprint, the community climate action plan has been an opportunity to engage our community’s residents in this important mission of tackling climate change, to explore how they can be in the driving seat of changes in our community, and how we can ensure we max out on the benefits that can come from these changes – warmer and more affordable-to-heat homes, quieter and safer streets and cleaner air.

Whilst we have got a lower-than-average carbon footprint, this does not necessarily reflect an awareness of climate change and energy saving, but reflects the inequalities in the city with regard to fuel poverty and an ability to heat their homes.

Our natural environment is critical to our well-being and the climate resilience of our ward. Lawrence Weston has an abundance of local green spaces, as well as Kingsweston House and Blaise Castle estate on our doorstep. We also have two local nature reserves which have been part of the city-wide ‘My Wild City’ project.

We have given consideration to the ambitions of the Ecological Emergency Strategy when developing the priorities of our Community Climate Action Plan. We have been doing a lot of work on environmental issues in Lawrence Weston, notably our triple award winning ‘Lawrence Weston in Bloom’ Project. There are two strands to this project. The first is around ensuring our green spaces are safe and clean for our residents to be able to use, and the second is our focus on the biodiversity (the amount of variety between different plants, animals and other species in a given habitat at a particular time) within our local community.

Thanks to the CHEESE projects energy audit of my home, they identified serious drafts entering my home following recent insulation works. This gave me the evidence to challenge the contractors who have now returned and rectified the work, and at long last I now have a much warmer comfortable home.

Jacki Crouch, Local Resident, vice chair of the Planning Group and Director of Ambition Lawrence Weston.
Our Baseline Community Carbon Footprint – what did it tell us?

Our carbon footprint report, produced by Bristol charity the Centre for Sustainable Energy, showed us the scale of our community’s carbon emissions and the main ‘consumption activities’ responsible for these emissions (that’s why it’s called a ‘consumption-based’ carbon footprint). Having a picture of what our community carbon footprint is helps us understand the activities which result in carbon emissions, and from here we can begin to think about the breadth of activities needed to reduce emissions, where to focus our attention, and to explore which activities are possible at the community-level, and which require Bristol-wide, national, or even global commitment and action.

What did we learn?

Here is our community’s total carbon footprint:

</tbody>
</table>
Climate action requires collective action.

By working together, we can take powerful Community Climate Action which reduces carbon and improves lives.

The climate action we take as individuals and households is critically important. And the actions of businesses and organisations too.

But we can’t solve the climate crisis without community. In Lawrence Weston it’s people working together that makes real change happen. With community we can achieve great things.

During the COVID pandemic, Community organisations in Bristol such as Ambition Lawrence Weston demonstrated significant leadership. Resident led community organisations are the experts of their place and the lived experience of their community, and so are well equipped to develop pragmatic and targeted solutions which work for their specific communities.

AN IMPORTANT STARTING POINT FOR DEVELOPING THIS PLAN HAS BEEN TAKING TIME TO LISTEN AND REALLY UNDERSTAND WHERE LOCAL PEOPLE ‘ARE AT’ IN THEIR LIVES FOLLOWING THE PANDEMIC

THE CLIMATE ACTION WE TAKE AS INDIVIDUALS AND HOUSEHOLDS IS CRITICALLY IMPORTANT AND THE ACTIONS OF BUSINESSES AND ORGANISATIONS TOO

The development of this plan happened during the COVID 19 pandemic, including: lockdowns, school closures, societal distancing measures and furloughing of staff. COVID compounded many of the existing inequalities experienced by many in our community. An important starting point for developing this plan has been taking time to listen and really understand where local people ‘are at’ in their lives following the pandemic. The Climate won’t necessarily be a priority for many as they emerge from the impacts of COVID, not because they don’t care, but because they have so many other immediate pressures in their lives – cuts to Universal Credit and the fear of having to choose between keeping warm and feeding themselves due to the rise in fuel bills.

This is where our plan’s focus on co-benefits for local people alongside carbon savings impact is essential. As our community recovers from the pandemic, our ambitions to a net carbon Bristol must also have improved the quality of life for our residents with social justice at its heart.
How we developed this plan

This plan was developed as part of the Bristol Community Climate Action Project. The Project Group (6 x community partners, Bristol Green Capital Partnership, Bristol City Council and Centre for Sustainable Energy) met regularly (on average twice a month) throughout the development phase. The flowchart below captures the main elements of the methodology to create Bristol’s first Community Climate Action Plans.

We developed an online survey consisting of different sets of questions to gather residents’ initial thoughts on a wide range of topics. We simultaneously hosted a wide range of workshops and activities. These workshops were for anyone living in Lawrence Weston, of any age, and we covered a range of topics including litter picking, cooking, winter salad window box making, creative solutions to cleaning your home, learning to cycle, nature drawing workshops, community gardening and growing.

All of this data was bought together and grouped into initial ‘Themes’. We then held a Community Event in October 2021 to finalise all of the residents’ priorities. Darren Jones MP opened our event with his keynote speech. We took all of the information that had been collected through the online survey, activities and the various workshops that we had delivered across the summer, to prioritise what matters to them and developed our final action plan. At the workshop the residents spent the afternoon going through each theme and adding in any tweaks as well as looking for other opportunities, fine tuning the priorities as well as finalising each of the project ideas and proposals.

Connecting city partners – through speed dating sessions and regular ‘meet the city partner’ slots of meetings to build knowledge and networks, updates to advisory board/BACCC/Environment Board.

Project communications throughout – by community partners and BGCP via press, website news articles, social media, podcasts, radio shows, films, creative commissions.
Roger Sabido’s journey into community energy – written by Roger

‘In 2012 I attended a talk which was part of the Bristol Festival of Ideas at the Create Centre, on the importance and even necessity of communities owning and building their own energy infrastructures, including wind. I had just begun to be involved with Ambition Lawrence Weston (ALW) and the talks were riveting eye-openers. ALW were in the throes of creating their first Community Plan, and I submitted the idea of owning our own wind turbine and community energy group.

Time rolled on, making it clearer to us how important energy costs were to communities like ours, and how some communities were responding by building or taking a share in local wind and solar generation. BEN (Bristol Energy Network) ran a fuel poverty workshop in 2014 introducing us to other BEN members which inspired me to get an energy group going in Lawrence Weston & invited David Tudgey to become ALWs community energy consultant and co-create and help deliver energy projects funded by The Big Local Trust and the Bristol Green Capital in 2015. One of the projects he supported as part of the energy group with other BEN members was The Cold Homes Energy Efficiency Survey Experts https://cheeseproject.co.uk, ALW were the original pilot recruiting local residents and champions to take part. We also ran community days to get DIY solar to inspire residents too which was fantastic and then this led to working with Bristol Energy Co-operative’s drive to build a solar farm on Lawrence Weston Road.

‘The case for community energy, even our own, now had real credibility. The aspiration of building a community owned wind turbine became a firm part of the renewed Lawrence Weston Community Plan. I am also a founding member and Director of Ambition Community Energy CIC. An immense amount of work yet to come. But, fingers crossed, a tremendous achievement for a small, and poor, community; and our thanks to the generous support and backing from many individuals.’
The following priorities and actions were developed with the local community through our community engagement process and refined with support from Bristol Green Capital Partnership and various Community Climate Action partners from across the city.

Scoring of priorities

We have scored several of our priorities through several criteria using a simple 1-5 scoring system:

<table>
<thead>
<tr>
<th>Criteria scored</th>
<th>Scoring definition:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Very Low</td>
</tr>
<tr>
<td>2</td>
<td>Low</td>
</tr>
<tr>
<td>3</td>
<td>Moderate</td>
</tr>
<tr>
<td>4</td>
<td>High</td>
</tr>
<tr>
<td>5</td>
<td>Very high /significant</td>
</tr>
</tbody>
</table>

**Timescale**

1 – 2 years (quick win)  
3 – 5 years (medium term larger scale)  
6 – 8 years (significant or complex)

Ambition Lawrence Weston will be working closely with the other partners to ensure that we maximise the outcome for citywide changes that are reflected in this plan. For example, improving public transport needs to happen across the city and not just in our community. We are also working closely with Bristol Disability and Equality Forum to ensure that all of our outcomes are accessible for all.
### Priority 1: Transport

#### 1.1 Develop a community owned electric car club scheme
- **Priority action**
  - Private Car Company Enterprise
  - Bristol City Council
  - Western Power Distribution
  - WECA
  - Bristol Energy Network
  - Ambition Lawrence Weston
  - South West Energy Hub
  - City Leap
  - Housing developers
- **Resource (cost) (scoring 1–5)**
  - 3
- **Impact: Carbon (scoring 1–5)**
  - 3
- **Impact: people/community co-benefits (scoring 1–5)**
  - 3
- **Resource (people) effort / capacity (scoring 1–5)**
  - 2
- **Impact: Carbon**
  - Reduction in petrol and diesel cars on road (Car club cars produce 72% lower emissions (PM2.5) than the average car. The positive impact is amplified by the fact that 18.5 private cars* are replaced by each car club vehicle)
- **Impact: people/community co-benefits**
  - Better air quality
  - No need to purchase/run own car
  - Access to a vehicle
  - Reduced noise pollution
- **Resource (people) effort / capacity**
  - Maintenance
  - Operations and management contract to manage all vehicles and charge points
  - Membership manager
  - Bespoke software working with Malvern Hills to manage bookings and payments
  - Governance structure
- **Timescale**
  - 1-2 years (quick win)

#### 1.2 Improved integrated transport systems - Citywide
- **Priority action**
  - Ambition Lawrence Weston
  - Bristol City Council
  - WECA
  - First Bus
  - Stagecoach
  - Great Western Railway
  - Uber
  - South West Energy Hub
  - Stagecoach
  - TravelWest
  - SevernNet
  - City Leap
  - Transport Planning
- **Resource (cost) (scoring 1–5)**
  - 3
- **Impact: Carbon (scoring 1–5)**
  - 3
- **Impact: people/community co-benefits (scoring 1–5)**
  - 3
- **Resource (people) effort / capacity (scoring 1–5)**
  - 2
- **Impact: Carbon**
  - Reduction in petrol and diesel cars on road
- **Impact: people/community co-benefits**
  - Better air quality
  - No need to purchase/run own car
- **Resource (people) effort / capacity**
  - Lobbying
- **Timescale**
  - 1-2 years (quick win)

#### 1.3 Improved walking and cycling routes and creating safer spaces on roads for active transport
- **Priority action**
  - Ambition Lawrence Weston
  - Bristol City Council
  - Sustrans
  - SevernNet
  - Life Cycle
  - Bristol Waste
  - Bristol Walking Alliance
  - BDEF
- **Resource (cost) (scoring 1–5)**
  - 2
- **Impact: Carbon (scoring 1–5)**
  - 4
- **Impact: people/community co-benefits (scoring 1–5)**
  - 4
- **Resource (people) effort / capacity (scoring 1–5)**
  - 2
- **Impact: Carbon**
  - Reduction in petrol and diesel cars on road
- **Impact: people/community co-benefits**
  - Improved Physical health
  - Reduced noise pollution
  - Improve air quality
  - Improved green spaces
- **Resource (people) effort / capacity**
  - Staff time
  - Project co-ordinator
- **Timescale**
  - 1-2 years (quick win)

#### 1.4 Create a mobility hub in Lawrence Weston to include E-Scooter/Bike scheme and community owned electric bikes as well as connecting to bus routes
- **Priority action**
  - Ambition Lawrence Weston
  - Private Companies
  - Bristol City Council
  - WECA
  - City Leap
  - BDEF
- **Resource (cost) (scoring 1–5)**
  - 3
- **Impact: Carbon (scoring 1–5)**
  - 4
- **Impact: people/community co-benefits (scoring 1–5)**
  - 4
- **Resource (people) effort / capacity (scoring 1–5)**
  - 2
- **Impact: Carbon**
  - Reduction in petrol and diesel cars on road
- **Impact: people/community co-benefits**
  - Improved Physical health
  - Better air quality
  - Reduced noise pollution
- **Resource (people) effort / capacity**
  - Management of scheme
- **Timescale**
  - 1-2 years (quick win)
## Priority 2: Housing/Buildings

### 2.1 Develop housing improvement projects (warm up, skill up)

**Priority action**

Develop housing improvement projects (warm up, skill up)

**Collaborations, Stakeholders, Supporters, Partners, Experts**

- CHEESE
- Men in Sheds
- Colleges
- Government schemes
- Bristol Energy Network
- Ambition Lawrence Weston
- City Leap
- Energy Rev
- Centre for Sustainable Energy

**Resource (cost)**

<td>3</td>
</tr>
</tbody>
</table>

**Timescale**

Medium term
### Priority 3: Energy

#### 3.1 Develop an Energy membership club as phase one in the development of an Energy wallet scheme and one stop shop approach

<table>
<thead>
<tr>
<th>Resource (cost) (scoring 1–5)</th>
<th>Impact: Carbon (scoring 1–5)</th>
<th>Resource (people) effort / capacity (scoring 1–5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Development and design of the software</td>
<td>• MEES <a href="http://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance">www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</a></td>
<td>• Quick win</td>
</tr>
<tr>
<td>• Legal fees of which about 60% (i.e., about 180 households) would likely sign up for the energy wallet account</td>
<td>• Access to funding and grants</td>
<td>• Staff time to apply for funding</td>
</tr>
<tr>
<td></td>
<td>• Improved mental health</td>
<td>• Staff time to manage the project</td>
</tr>
<tr>
<td></td>
<td>• Reduced fuel poverty</td>
<td>• 10 Energy Wallet Champions trained within the phase 1 of the project</td>
</tr>
</tbody>
</table>

#### 3.2 Identify suitable sites for renewable infrastructure, including solar PV, wind turbines, micro grids, Battery technology and EV charge points to create a smart local (with community ownership models) energy system

<table>
<thead>
<tr>
<th>Collaborations, Stakeholders, Supporters, Partners, Experts</th>
<th>Impact: people /community co-benefits (scoring 1–5)</th>

</tbody>
</table>

**Identify Suitable Sites for Renewable Infrastructure, Including Solar PV, Wind Turbines, Micro Grids, Battery Technology and EV Charge Points**
### Priority 4: Food

#### Priority action

**Support more local growing projects**

- Ambition Lawrence Weston
- Allotment Association
- Lawrence Weston in Bloom
- Gardening Groups
- Local schools including childcare providers
- Incredible Edibles
- Avon Wildlife Trust
- Blaise Nursery
- Friends of the Earth
- Bristol Food Network
- BDEF
- Heart of BS13

#### Resource (cost)

- Upfront costs
- Materials
- Capital costs

#### Impact: Carbon

- More biodiversity
- Less demand on shop bought edibles
- Less packaging and waste

#### Impact: people /community co-benefits

- Better access to healthier food
- More cost effective
- Reduce social isolation
- Improved green spaces

#### Resource (people)

- Management of projects
- Staff time

#### Timescale

- 1-2 years (quick win)
- 3-5 years (medium term larger scale)
- 6-8 years (significant or complex)

- More biodiversity
- Less demand on shop bought edibles
- Less packaging and waste
- Better access to healthier food
- More cost effective
- Reduce social isolation
- Improved green spaces

#### Commercial food waste collection

- Bristol Waste
- GENeco
- Ambition Lawrence Weston
- Resource Futures

#### Resource (cost)

- Bins
- Collection of bins

#### Impact: Carbon

- More food waste going to GENeco for biomass production

#### Impact: people /community co-benefits

- Reduced fuel poverty

#### Resource (people)

- Staff

#### Timescale

- Short to medium term
### Priority 5: Waste and Consumption

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>

<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>5.1 Priority 5.1</td>
<td>• Recycling (free) collection for bulky items &lt;br&gt;• A managed excess building materials reuse scheme</td>
<td>1 &lt;br&gt;• Community generated subsidies and funds</td>
<td>2</td>
<td>3 &lt;br&gt;• Older appliances contain Freon gas which depletes the ozone layer</td>
<td>2</td>
<td>1-2 years (quick win)</td>
</tr>
<tr>
<td>5.2 Support existing, and set up new projects that reduce waste and consumption</td>
<td>• Ambition Lawrence Weston &lt;br&gt;• Men in Sheds &lt;br&gt;• SevernNet &lt;br&gt;• Lawrence Weston in Bloom &lt;br&gt;• Community shop &lt;br&gt;• Blaise Nursery &lt;br&gt;• Resource Futures &lt;br&gt;• BDEF</td>
<td>2 &lt;br&gt;• Set up costs &lt;br&gt;• Running costs</td>
<td>2</td>
<td>3 &lt;br&gt;• Financial benefits &lt;br&gt;• Reduce social isolation &lt;br&gt;• Improved mental health</td>
<td>2</td>
<td>3-5 years (medium term larger scale)</td>
</tr>
<tr>
<td>5.3 Reduce single use plastic</td>
<td>• Ambition Lawrence Weston &lt;br&gt;• Local traders &lt;br&gt;• Supermarkets &lt;br&gt;• Resource Futures</td>
<td>2 &lt;br&gt;• Campaigning &lt;br&gt;• Provision of alternatives to single use plastics</td>
<td>3</td>
<td>3 &lt;br&gt;• Reduction of microplastics in the environment &lt;br&gt;• Improved mental health &lt;br&gt;• Cleaner neighbourhood &lt;br&gt;• Pride of place &lt;br&gt;• Improved green spaces</td>
<td>1</td>
<td>6-8 years (significant or complex)</td>
</tr>
<tr>
<td>5.4 Identify potential biogas (as well as hydrogen from electrolysis – powered by renewable energy) vehicles for commercial distribution vehicles</td>
<td>• CENeco &lt;br&gt;• Resource Futures &lt;br&gt;• Bristol Waste</td>
<td>2 &lt;br&gt;• Capital costs</td>
<td>3</td>
<td>3 &lt;br&gt;• Less commercial waste going to landfill &lt;br&gt;• Less diesel vehicles on the road</td>
<td>1</td>
<td>• Quick win</td>
</tr>
</tbody>
</table>

**Resource (people):**
- **Effort / Capacity:**
  - Community generated subsidies and funds: 2
  - Set up costs: 2
  - Running costs: 3
  - Campaigning: 3
  - Capital costs: 2
- **Impact:**
  - Carbon: 1
  - People /Community co-benefits: 1
  - Staff time: 1
- **Timescale:**
  - Quick win
  - Medium term (3-5 years)
  - Short to medium term (6-8 years)
  - Significant or complex (1-2 years)
### Priority 6: Nature

#### 6.1 Gardening project helping elderly and disabled residents maintain their gardens

**Collaborations, Stakeholders, Supporters, Partners, Experts**
- Ambition Lawrence Weston
- Lawrence Weston in Bloom
- Gardening Project
- Men in Sheds
- Local volunteers
- Social enterprise
- Blaise Nursery
- Friends of the Earth
- Resource Futures
- BDEF

**Impact: Carbon (scoring 1–5)**
- More biodiversity within the community
- Better habitat for local wildlife
- More trees planted

**Impact: people /community co-benefits (scoring 1–5)**
- Improved mental health
- Improved safety
- Improved green spaces

**Resource (cost) (scoring 1–5)**
- Set up costs
- Materials
- Tools
- Disposal licence?

**Resource (people) effort / capacity (scoring 1–5)**
- Project management
- Staff costs

**Timescale**
- Quick win

**Impact: people /community co-benefits**
- More appealing neighbourhood
- Financial benefit of not buying tools unnecessarily
- Improved mental health
- Improved safety
- Improved green spaces

**Impact: Carbon**
- More biodiversity within the community
- Better habitat for local wildlife
- More trees planted

- Lawrence Weston Planning Group
- Bristol City Council
- Ambition Community Energy CIC
- Business West
- Bristol Housing Festival
- CSE future proof project

**Resource (cost)**

- Use of other organisations budget

**Impact: Carbon**

- Equipping students with the skills that employers are looking for to create a greener future with more green skills and training

**Impact: people/community co-benefits**

- Improved high skilled work force
- More economic power
- Increased employment sustainability

**Resource (people)**

- Use of other organisations staff and skills

**Timescale**

- 1-2 years (quick win)
- 3-5 years (medium term larger scale)
- 6-8 years (significant or complex)

**Impact: people/community co-benefits**

- More appealing neighbourhood
- Better facilities and homes

**Resource (cost)**

- Use of other organisations budget

**Timescale**

- Quick Win

**More appealing neighbourhood**

**Better facilities and homes**
How our plan makes strategic connections

The themes and projects identified within our Climate Action Plan demonstrates our commitment to Bristol realising a NetZero target by 2030 ahead of the UK’s national target for NetZero by 2050. Indeed already our contribution in developing our onshore wind turbine will produce the equivalent renewable electricity for the number of households in Lawrence Weston. But our climate action plan is going beyond carbon savings and is focused on improving the lives and well-being of our residents to ensure they have good quality warm homes that they can afford to heat, as well have access to an integrated transport system that allows them to access the city and wider region. We have a vision for our young people to access the jobs that will be created from the transition from a fossil fuel economy to a NetZero carbon economy which is why our focus on improving skills is set out alongside the development of our onshore wind project. We are privileged to benefit from wildlife from the surrounding area of the Severn Estuary and the woodlands of the Blaise Castle, and connections with local food and farming through our Lawrence Weston Community Farm and allotments which this plan will enhance our residents awareness and participation in improving our local green spaces surrounding our homes.

**WE CAN AND MUST IMPROVE ALL RESIDENTS’ LIVELIHOODS WHILST TACKLING THE CLIMATE EMERGENCY AS THEY HAVE THE LEAST RESOURCES TO ADAPT TO THE CHANGING ECONOMY AND PARTICIPATE ACTIVELY IN AN ENERGY TRANSITION**

This plan must be supported in order for it to succeed and for the city to succeed in its own One City Plan. Over the last 12-18 month with COVID-19 we have already seen an end to the generation upon generation economic progress and the incomes of our residents in real terms reduce spending power and increase dependence on foodbanks. We can and must improve all residents’ livelihoods whilst tackling the climate emergency as they have the least resources to adapt to the changing economy and participate actively in an energy transition. Our plan reflects the wider strategies and plans of the One City Climate Strategy, COVID recovery, Citizen Assembly, Ecological Emergency Strategy recommendations. Therefore our plan creates the opportunity for other city partners to participate and support Ambition Lawrence Weston to deliver its Climate Action Plan and in doing so also supports a recovery of not just of our community but also the whole city with a Community Led Smart Local Energy System.

**WE ARE PRIVILEGED TO BENEFIT FROM WILDLIFE FROM THE SURROUNDING AREA OF THE SEVERN ESTUARY AND THE WOODLANDS OF THE BLAISE CASTLE, AND CONNECTIONS WITH LOCAL FOOD AND FARMING THROUGH OUR LAWRENCE WESTON COMMUNITY FARM AND ALLOTMENTS**
Glossary of Terms

Biodiversity:
All the different kinds of life you’ll find in one area—the variety of animals, plants, fungi, and even microorganisms like bacteria that make up our natural world.

Biomass:
Plant or animal material used as fuel to produce electricity or heat (e.g. energy crops, waste from forests, yards, or farms. Since biomass can also be used as a fuel directly (e.g. wood logs), some people use the terms biomass and biofuel interchangeably.

Carbon emissions:
The carbon dioxide gas that planes, cars, factories, etc. produce which contribute to climate change. Carbon footprint: A tool to help us understand what changes we need to make to cut our emissions. They show us which actions result in emissions, and how much.

Circular economy:
An economic system of production/consumption based on using renewable resources, eliminating waste and reusing and recycling goods for as long as possible.

Climate change:
Whilst greenhouse gases occur naturally, human activity (especially the use of 'fossil fuels' - oil, gas, coal) has led to hugely increased levels of these gases. This has led to the earth getting hotter, and our climate changing all over the world. Our climate affects everything on earth – the landscapes, seas, animals, plants, and of course people – and small changes in climate can impact where humans and animals can live, what and how much we can grow, our health, our sea levels, and much more.

Green jobs:
Green jobs are those which are in some way contribute to reducing the consumption of energy and raw materials, limit greenhouse gas emissions, minimise waste and pollution and protect and restore ecosystems.

Greenhouse gases:
Carbon dioxide, and other ‘greenhouse gases’, trap heat in the atmosphere and keep the earth warm (which is why they’re called greenhouse gases). These gases, which occur naturally, make the earth a habitable place – without them it would be too cold to live here.

Just transition:
Ensuring the transition to a low carbon society/economy is equitable, that any benefits are shared widely, whilst supporting those who stand to lose out economically.

Renewable energy:
Energy that is generated from natural processes that cannot be exhausted and is constantly renewed (including solar/sunlight, geothermal heat, wind, tides, water).

Retrofit:
The introduction of new materials, products and technologies into an existing building to reduce the energy needed to occupy/use that building. Wildlife corridors: A strip of natural habitat connecting populations of wildlife otherwise separated by cultivated land, roads, housing etc.

Natural habitat:
The natural environment in which a species of plant/animal/fungi etc lives.

Net zero and carbon neutral:
This means that any carbon dioxide that is emitted by the activities taking place is balanced by the same amount of carbon dioxide being absorbed from the atmosphere (sometimes achieving net-zero carbon dioxide emissions is referred to as ‘carbon neutrality’).

Wildlife corridors:
A strip of natural habitat connecting populations of wildlife otherwise separated by cultivated land, roads, housing etc.
Acknowledgements

Ambition Lawrence Weston would like to thank the following people and organisations for their contribution to the development of this Community Climate Action Plan:

• The members of Lawrence Weston community who took the time to engage in our consultation and community engagement process

• All the local community groups and organisations that have contributed (including: local schools and churches)

• The Community Climate Action Project partners: Bristol Green Capital Partnership (Amy Harrison), Bristol City Council (Mark Leach) CSE (Harriet Sansom), Eastside Community Trust (Emily Fifield), ACH (Katya Thickpenny Ryan), Bristol Disability Equalities Forum (Emma Geen), Lockleaze Neighbourhood Trust (Karen Edkins), Heart of BS13 (Kirsty Hammond) and Donna Sealey (Ambition Lawrence Weston) for their support and collaboration through the Community Climate Action Project

• All the Community Climate Action City partners who contributed to the Peer Review Roundtable event (Nov 2021)

• Community Artists Dee Moxon, Morgan Tipping and Tommy Chavennes for their creative contribution to our community engagement process

• The National Lottery Community Fund: Climate Action Fund for supporting the development of this plan.
